

Grupp X

Group Meeting 20/09

20 SEPTEMBER 2021 / 08:00 PM / ROOM ED-3705

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall

AGENDA

Reports

1. Work on FXML/CSS has progressed over the weekend. Basic class for User has been created (for our model)

Objectives

- Further discuss user stories and adapt tasks.
- See over UML diagram and discuss implementation strategies.
- Assign new tasks to members of the group (if needed).

NOTES

- Focus will be split between interface design and structuring the code further (i.e. creating all classes and interfaces we need in the code)
- We still need to create a proper domain model. Will be done once we set up a proper sequence diagram for our features.
- The majority of the code has been written collaboratively, but it has not been split evenly between the members, so there is some imbalance in the repository. However, everyone is working actively.

ACTION ITEMS

1. Kevin will continue working on design elements in SceneBuilder.
2. Carl-Magnus will start implementing the Listing class.
3. Pegah will start implementing the Book class.
4. Simon will keep working on implementing methods and logic for our model and investigate how we can connect the view/controller.

END OF MEETING

Next supervision meeting will be held on 23/9 at 13:15

Next group meeting will be held on 24/9 at 08:00.
