

Grupp X

Supervision Meeting 03/09

04 SEPTEMBER 2021 / 15:15 PM / ROOM ED-3705

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall, Leo (supervisor)

AGENDA

Reports

1. The group has come together and decided on a project. We are going to develop a mobile application where Chalmers students are able to buy and sell used literature from/to each other. A preliminary GUI has been created. We have also constructed several user stories, and started working on a UML diagram.

Objectives

- Discuss project plan with supervisor.
- Ask about general details regarding the project, i.e. which features to focus on.
- Ask how to write the different reports.
- Decide when to have future supervision sessions.

NOTES

- Focus on POC, use mock data when needed.
- People will most likely use the application to get in contact with sellers/buyers and then settle their business in person, so don't think about implementing payment options.

- Chat function would be cool, but not reasonable to implement within the given timespan.

ACTION ITEMS

1. Work on UML and GUI design together on campus.
2. Properly construct user stories.

NEXT WEEK'S AGENDA

Next group meeting will be held on 6/9 at 15:15.
