

Grupp X

Group Meeting 13/09

13 SEPTEMBER 2021 / 08:00 PM / ROOM ED-3705

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall

AGENDA

Reports

1. First draft of UML finished. GUI ready for demo during seminar.

Objectives

- Discuss seminar, domain model.
- Discuss project structure in the IDE.

NOTES

- UML design is looking good overall, but we need to address the cross-dependency of Listing/User.
- We do not have a proper domain model, only a design model.
- As soon as the project is properly set up, and everyone can work with what's on the repository, we will begin working on the code.
- We have to shift our work to IntelliJ from Android Studio.

ACTION ITEMS

1. We have to sit down and create a proper domain model for the seminar.
Will be done as a collaborative effort today/tomorrow.
2. Project structure needs to be set in stone.
3. Shifting from Android Studio to IntelliJ will happen immediately.
4. Sit down together and start working with our RDD, focusing on user stories etc.

END OF MEETING

Next supervision meeting will be held on 16/9 at 15:15

Next group meeting will be held on 17/9 at 08:00.
