

Grupp X

Group Meeting 18/10

18 OCTOBER 2021 / 08:30 PM / ROOM ED-3705

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall

AGENDA

Reports

1. Since the last meeting, the group has made appropriate classes package-private and immutable. Pegah has worked on, and implemented a couple of features related to book reservations and previous purchases. Simon has implemented the search feature.

Objectives

- Discuss the final week, schedule presentation practice.
- Discuss peer review!
- Discuss final features, we are nearly done.
- Discuss PMD results.
- Discuss JavaDocs a little bit, sorely needed in some places.
- Discuss UML, needs to be mended a bit.

NOTES

- Peer review was great to read, lots of good suggestions and praise.
- Peer review criticized many of the things we were expecting, which is good.
- We have been working according to certain patterns, but quite subconsciously. Look into this, and refactor accordingly.
- We need to delegate some focus to the report.
- PMD results indicate some easy to fix problems, good news.
- JavaDocs need to update, quite a few methods are not commented on.
- Almost all functionality is implemented.

ACTION ITEMS

1. Each member will start writing drafts for their part of the script and we will discuss our parts tomorrow.
2. Carl-Magnus will implement editing of listings.
3. Everyone will work on different tests of different methods, we need at least 90% coverage.
4. Pegah and Kevin will finalize subscription functionality.
5. Simon will implement sorting by most subscribed books.

END OF MEETING

Next supervision meeting will be held on 21/10 at 13:15

Next group meeting will be held on 19/10 at 08:30.
