

Grupp X

Supervision Meeting 09/09

09 SEPTEMBER 2021 / 15:15 PM / ROOM ED-3705

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall, Leo (supervisor)

AGENDA

Reports

1. The group has continued working on both the GUI design in Figma as well as the UML structure of the application. We have decided to finalize the UML for the seminar before starting work on overall code structure.

Objectives

- Further discuss GUI design with our supervisor.
- We have to clear up any UML/design pattern issues before moving forward.
- Ask if our current meeting format is sufficient.
- Should we upload the meeting documentation to the repository?

NOTES

- GUI design is looking good.
- UML design is looking good. The Controller can have the model and view in its constructor, or create instances of both. Observer pattern reasonably implemented.
- UML only needs a few touches before the first draft is complete.
- Adapt user stories to our design choices.

ACTION ITEMS

1. The group will discuss the user stories together and edit the ones in need.
2. UML finalization will be a group effort. Looking to be done on Friday 10/9.
3. Basic code structure will be developed as a joint effort on Friday 10/9. Will be pushed to the repository so that we all can toy around with it during the weekend.

NEXT WEEK'S AGENDA

Next meeting will be held on 10/9 at 08:15
