

Grupp X

Extra Group Meeting 14/09

13 SEPTEMBER 2021 / 08:30 PM / ROOM ED-3705

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall

AGENDA

Reports

1. Basic code structure created.

Objectives

- Discuss seminar, domain model.
- Discuss project structure in the IDE.

NOTES

Reason for the meeting:

- Project is not properly set up with the IDE, so the project is manageable for one person, but the rest have different issues. This has to be fixed right away.

ACTION ITEMS

1. We should save whatever code we have, since there's nothing wrong with the logic, but we need to recreate the project from scratch. Just to be sure we got everything we need. We will create a Maven-based JavaFX project (with testing) through the latest edition of IntelliJ. This makes everything simple. We also need to remove the old project and make sure our gitignore has the necessary directories/files.

END OF MEETING

Next supervision meeting will be held on 16/9 at 13:15

Next group meeting will be held on 17/9 at 08:00.
