

Grupp X

# Peer Review Meeting 12/10

---

12 OCTOBER 2021 / 08:30 PM / Discord

## ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall

## AGENDA

### Reports

1. Not much has happened since yesterday, apart from the fact that a few test classes have been added.

### Objectives

- Discuss the project of the group Grapefruit.
- Write peer review.

## NOTES

- Grapefruit has good code structure. We can understand it pretty well.
- We found that some design patterns have been used, for example Observer, Factory and Interface Segregation.
- UML needs to be worked on.
- We found quite a few improvement options.
- Looking at the other group's code made us realize things about our own code, and how we can improve on it. We found it incredibly helpful to perform this review.

- We look forward to receiving feedback on our project, cause we are aware of things that need to be refactored. It will be interesting to see if the other group has the same ideas that we do.

## **ACTION ITEMS**

1. Action items remain the same from yesterday.

## **END OF MEETING**

Next supervision meeting will be held on 14/10 at 13:15

Next group meeting will be held on 15/10 at 08:30.
