Grupp X

Supervision Meeting 16/09

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall, Leo (supervisor)

AGENDA

Reports

1. The group attended the seminar on 14/9 and found it great to see what other groups are working on. We had misunderstood which model to bring to the seminar (we brought the design model), but we were able to construct a domain model before it was our time to present our project. Issues regarding project structure have been mended, and we should be able to continue our work as planned. This issue, in combination with external course load, has slowed down this week's progress.

Objectives

- Discuss the issues we had with the project structure.
- Discuss domain model(?)
- Discuss cross-dependency

NOTES

- Domain model needs some adjustments.

- Solve cross-dependency. Set up a sequence diagram to see how we could improve on the model.

- Rebuild the project from scratch, easiest way to solve our problems.

ACTION ITEMS

1. New project will be created through the latest version of IntelliJ, specifying a JavaFX project with Maven as the base, and JUnit compatibility.
2. Alternate solutions to the current User/Listing dependency will be investigated.
3. First priority is getting the code properly structured.

NEXT WEEK'S AGENDA

Next meeting will be held on 17/9 at 08:00
