Grupp X

Supervision Meeting 23/09

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall, Leo (supervisor)

AGENDA

Reports

1. Since the last meeting the group has continued to structure the code according to the UML diagram. Some design work has also progressed.

Objectives

- Discuss updated code structure and code design.
- Ask if our dependency approach and separation strategies are reasonable.
- Ask about the sequence diagram we created.

NOTES

- Implement getters/setters appropriately.

- ApplicationView is more of an ApplicationViewManager, since it handles the different views. Same goes for the ApplicationController.

- Separation looks alright, now we just need to link classes, so that they work in tandem.

- Implement some logic here and there and test the code as much as possible.

ACTION ITEMS

1. Work on linking classes starts today after the meeting. (ALL)
2. Focus will be assigned to making the view and controller interact with each other.

NEXT WEEK'S AGENDA

Next meeting will be held on 24/9 at 08:00
