Grupp X

Group Meeting 04/10

ATTENDEES

Pegah Amanzadeh, Simon Holst, Kevin Pham, Carl-Magnus Wall

AGENDA

Reports

1. The group has been preparing the RDD and SDD for the peer review hand-in on Thursday 7/10. The domain model has seen some updates as well. The group has also started discussing JavaDoc implementation. The code has been working smoothly ever since the View/Controller refactoring was done.

Objectives

- Further discuss and assign tasks regarding JavaDocs.
- Discuss UML refactoring.
- Discuss RDD and SDD drafts.
- Discuss Observer pattern refactoring.
- Various questions.

NOTES

- Code seems stable, but we need to explore implementations of certain features. How should we use mock data to our advantage?

- We are not using anything except the code itself at the moment, so we are unsure what to put under the System Architecture- and Persistent Data sections of the SDD. Make suggestions? Point at proof of concept?
- RDD is shaping up. First draft nearly done.

ACTION ITEMS

1. Finish the SDD draft. (ALL)
2. Add JavaDocs to all classes. (ALL)
3. Adapt UML to the new design. (ALL)
4. Finish the design of the final views. (Kevin)
5. Create tests once logic is in place. (ALL)

END OF MEETING

Next supervision meeting will be held on 7/10 at 13:15

Next group meeting will be held on 8/10 at 08:00.
